

Air 1 is such an awesome addition to myself, my family and my community as a whole. It is uplifting, calming, and has a good message unlike most radio stations, yet also gives a great hip tone to it so that our young adults are encouraged, and want to listen too. If we didn't have air1 to listen to, the alternatives would not be as effective. There is just something about air1. It is in the best of public interest to maintain air1's air coverage area, in fact it would be in public interest to expand air1's area coverage if possible.
